

EXAMPLES OF COMPLETED FORMS – NOTABLE DETAILS

This page is included to provide help understanding the following example forms.

#1 Aerosol Coating Product

FORM 1 – Responsible Party Information

- ABC Enterprises, Inc. is composed of multiple divisions, including Seeger Paints.
- A parent company, Environmental Solutions Marketing, was listed in Item 2 because ABC Enterprises is not independently owned.

FORM 2 – Contact(s) for Ingredients

- "No" has been checked because ABC Enterprises, Inc. holds all the ingredient information about their products.

FORM 3 – Product Information

- The product, Seeger Decorative Touch Pastel, was reported as a product group because it qualifies per the product group definition found on the Supplement to FORM 3 and on page 49. The different colors and sizes available for this product were detailed on the Supplement to FORM 3.
- In Item 11, "Yes" was checked for the question regarding products that contain resins, polymers, or other film-forming compounds.
- In Item 12, the "Volume/Mass Filled" indicates that the product is slightly overfilled and the total contents, per each size available, were reported here.
- The total number of cans of each size sold was reported under "Number of Individual Product Units Sold."

FORM 4 – Ingredients

- As shown in both the Specific Ingredients list and Speciation Table, ingredients were reported to the nearest 0.1% as instructed.
- Each ingredient required to be reported in the Item 2, Speciation Table, was listed with its corresponding CAS number.
- One ingredient is a hydrocarbon solvent, so the trade name, manufacturer, and bin number has been listed, in addition to the chemical name and CAS number.

#2 Consumer Product

Many of the items listed above also apply to Example #2. The items listed below are different from the applicable information above.

FORM 1 – Responsible Party Information

- See description above regarding parent companies.

FORM 2 – Contact(s) for Ingredients

- "Yes" has been checked because TD Pen Company does not hold the ingredient information about their products and their formulator contact information has been provided.

FORM 3 – Product Information (black marker data)

- The product, 6 Color Set B, is a set of 6 different colored markers. The set, all together, does not qualify as a product group because the black marker in the package has a greater than 2% variation in VOC content compared to the other markers in the set. The black marker was reported as product tracking #1 while the other five (color) markers in the set were reported as a product group in product tracking #2. See Supplement to FORM 3 or page 49 for definition of product group.

#2 Consumer Product (Continued)

FORM 3 – Product Information (black marker data – continued)

- The Delivery or Packaging System, Item 5, was reported as "Other: marker" while the Dispensed Form, Item 6, was marked "liquid" to reflect the chemical formulated component of the marker.
- In Item 10, the sales data was estimated by prorating "national" sales as indicated. Attachment C may have been used to report the "Number of Individual Product Units Sold."
- In Item 12, the "Product Size" indicates 6 markers as specified on the label while the "Volume/Mass filled" has the contents of liquid, 2cc, imparted to the black marker.
- A comment was provided to clarify the situation with this particular product.

FORM 4 – Ingredients (black marker data)

- The specific gravity has been provided in Item 3 because the product is filled by volume.

FORM 3 – Product Information (color marker group data)

- The five (color) markers in the set were reported as a product group here because they qualify per the product group definition found on the Supplement to FORM 3 and on page 49.
- In Item 12, the "Product Size" indicates 6 markers as specified on the label while the "Volume/Mass filled" has the contents of liquid of the 5 color markers in the package, 10cc (2cc per marker).
